

Map Indexes Available from the U.S. Geological Survey

Each year the U.S. Geological Survey (USGS) produces thousands of new and revised topographic and geologic maps, as well as other types of cartographic products. To provide easy access to these maps, the USGS publishes indexes that are updated periodically.

State Indexes

State Index to Topographic and Other Map Coverage - A State index is designed to inform map users of the various series of topographic maps produced and distributed by the USGS and to assist users in selecting and purchasing maps. Printed on a State base map, each State index identifies quadrangle areas and other format maps by reference code, map name, and scale. These indexes are being updated through digital cartographic technology.

State Map List - The companion publication to a State index is the State Map List. This publication lists alphabetically, by map type and scale, the stock numbers, names, and version dates of the available maps.

United States Indexes

Many of the United States Indexes are no longer being updated. For further information, contact the office listed.

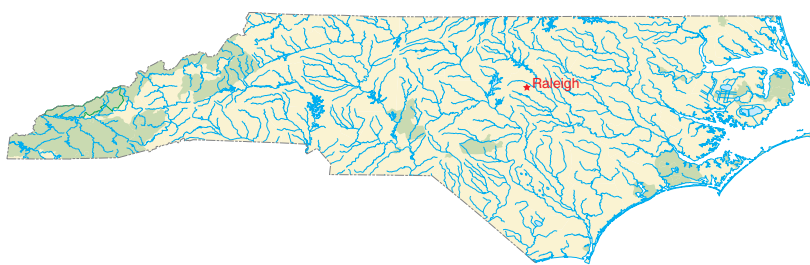

Ordering Information

To obtain these free USGS map indexes by mail, contact:

USGS Information Services, Box 25286,
Federal Center, Bldg. 810, Denver, CO

Information

For information on other USGS products and services, call 1-888-ASK-USGS, or visit the general interest publications Web site on mapping, geography, and related topics at erg.usgs.gov/isb/pubs/publists/.

For additional information, visit the ask.usgs.gov Web site or the USGS home page at www.usgs.gov.

North Carolina Map List

How to order USGS maps

Use the information in this list to fill out a USGS Maps Order Form. For additional information, call 1-888-ASK-USGS.

This list may include selected maps originally produced by the National Imagery and Mapping Agency (NIMA) and other Federal agencies.

USGS Map Lists are online at:
<http://mapping.usgs.gov/mac/maplists>

How to use this map list

Within this list, maps are grouped by scale and then alphabetically by map name. The listing for each map includes the **stock number** (a unique number needed to process an order) and the **map name** printed on the map (corresponding to the name shown on the index). **Lat.** and **Long.** show the latitude and longitude for (in most cases) the southeast corner of the map.

Note:

Date indicates the version of the map. The date shown in this list is the latest date printed under the map name in the lower right-hand corner of the map.

For other than standard topographic maps, a type code (for example: [TB], [OM], etc.) is printed after the map name. Please refer to the list of map types below.

Code	Map Type
[CF]	County (feet)
[CI]	Color Image
[CM]	County (metric)
[EI]	Ecological Inventory

Code	Map Type
[PF]	National Park or Monument (feet)
[PL]	Planimetric
[PM]	National Park or

Code	Map Type
[RR]	Regional (shaded relief)
[RS]	Radar (satellite)
[SI]	Satellite Image
[SM]	Surface Management Status
